

Vishakha Prajapati

Frontend Developer | React.js | JavaScript

PROFESSIONAL SUMMARY

Computer Science student with strong skills in JavaScript, React.js, and frontend development. Experienced in building responsive web applications and interactive user interfaces using component based architecture.

SKILLS

Frontend: React.js, JavaScript (ES6), HTML5, CSS3

Programming: Java, C++, C, Python

Tools: Git, GitHub, VS Code

Concepts: Responsive UI, API Integration, Component-based Architecture

Machine Learning: PyTorch, HuggingFace Transformers, Model Fine-tuning, Ensemble Learning

NLP: Text Classification, Fake News Detection, BERT, RoBERTa

Backend: FastAPI, REST APIs, uvicorn

EDUCATION

Khandelwal College of Management Science and Technology

BCA – Computer Application

2023 – 2026 (Expected)

CERTIFICATES

- Advanced JavaScript – Sololearn
- Intermediate Java – Sololearn
- Frontend for Beginners – Sololearn
- Machine Learning for Beginners – Sololearn

PROJECTS

DETECTRA – AI FAKE CONTENT DETECTOR (2026 / Team Project)

- Fine-tuned transformer models on 683+ images to detect AI-generated content, achieving 99% image accuracy and 95% rumor detection accuracy using an ensemble and hybrid rule-based approach
- Built a deepfake video detection pipeline using OpenCV that analyzes frames extracted from uploaded videos or YouTube links
- Developed and integrated a FastAPI backend with 6 REST endpoints connecting the AI models to the frontend, supporting image, video, news, and link-based detection
- Tech Stack: Python, PyTorch, HuggingFace Transformers, FastAPI, OpenCV, JavaScript

REACT PORTFOLIO WEBSITE (Personal Project)

- Designed and developed a fully responsive personal portfolio using React.js, with reusable components like Navbar and Project Cards for a clean, maintainable codebase
- Optimized the layout for both mobile and desktop viewports using CSS, ensuring a consistent experience across devices
- Tech Stack: React.js, JavaScript, HTML, CSS

WORD UNSCAMBBLE GAME (Personal Project)

- Built a browser-based word puzzle game from scratch where players unscramble shuffled words with real-time input validation using JavaScript
- Styled the entire game interface with responsive CSS to work across different screen sizes
- Tech Stack: HTML, CSS, JavaScript

EXTRACURRICULAR

National Cadet Corps (NCC) Cadet: Demonstrated discipline, leadership, teamwork, and ability to perform in structured environments.
