

Vishakha Prajapati

Frontend Developer | React.js | JavaScript

+91 6397521103 | 06vishakhaprajapati@gmail.com | linkedin.com/in/vishakha-prajapati1 | Bareilly, UP

PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building responsive web applications and interactive user interfaces using React.js, JavaScript, and component-based architecture. Passionate about clean code and practical AI solutions, with additional expertise in NLP, transformer models, and FastAPI backend development.

SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3

Programming: Java, C++, C, Python

Tools: Git, GitHub, VS Code

Backend: FastAPI, REST APIs, uvicorn

ML / NLP: PyTorch, HuggingFace Transformers, BERT, RoBERTa, Ensemble Learning, Fake News Detection

Concepts: Responsive UI, API Integration, Component-based Architecture, Model Fine-tuning

PROJECTS

DETECTRA – AI Fake Content Detector | 2026 | Team Project | *In Progress*

- Fine-tuned transformer models on 683+ images to detect AI-generated content, achieving 99% image accuracy and 95% rumor detection accuracy using an ensemble and hybrid rule-based approach.
- Built a deepfake video detection pipeline using OpenCV to analyze frames from uploaded videos or YouTube links.
- Developed a FastAPI backend with 6 REST endpoints connecting AI models to the frontend, supporting image, video, news, and link-based detection.
- Tech Stack: Python, PyTorch, HuggingFace Transformers, FastAPI, OpenCV, JavaScript

Word Unscramble Game | Personal Project | <https://word-unscramble.vercel.app>

- Built a browser-based word puzzle game where players unscramble shuffled words with real-time input validation, using vanilla JavaScript with zero dependencies.
- Styled a fully responsive game interface with CSS to work seamlessly across different screen sizes and devices.
- Tech Stack: HTML, CSS, JavaScript

Guesser – Word Guessing Game | Personal Project | <https://guesser-jade.vercel.app>

- Developed an interactive word-guessing game with logic-driven hints, guess tracking, and an engaging UI built with pure JavaScript.
- Implemented game state management and win/loss conditions using vanilla JS without any external libraries.
- Tech Stack: HTML, CSS, JavaScript

SkyCast – Weather App | Personal Project | <https://skycast-3ofv.vercel.app>

- Built a live weather application that fetches real-time data from a public weather API and displays temperature, conditions, and forecasts in a clean UI.
- Implemented location-based search and responsive design for a smooth experience on both mobile and desktop.
- Tech Stack: HTML, CSS, JavaScript, REST API

React Portfolio Website | Personal Project | <https://vishakhapatnam-portfolio-six-mu-m3bbrwpn9s.vercel.app>

- Designed and developed a fully responsive personal portfolio using React.js with reusable components such as Navbar and Project Cards for a clean, maintainable codebase.
- Optimized layout for both mobile and desktop viewports using CSS, ensuring a consistent cross-device experience.
- Tech Stack: React.js, JavaScript, HTML, CSS

EDUCATION

Khandelwal College of Management Science and Technology | Bareilly, UP

BCA – Computer Applications | 2023 – 2026 (Expected)

CERTIFICATIONS

Advanced JavaScript, Intermediate Java, Frontend for Beginners, Machine Learning for Beginners – Sololearn

EXTRACURRICULAR

National Cadet Corps (NCC) Cadet | Demonstrated discipline, leadership, teamwork, and ability to perform in structured environments.
